

# MICROMARBLE FIREPLACES

# INTRODUCING THE FDC MICROMARBLE COLLECTION.

We are proud to present our exciting new brochure featuring micromarble fireplaces and surrounds from FDC. Within, you will find a selection of new designs and materials accompanied by some tried and tested favourites.

Honed Ariston is the new addition to our micro-grain marble range and in its own unique way will make striking statements in any home.

We are continually improving and expanding our product range, regularly introducing new designs and incorporating new materials.

Over years of growth our philosophy has remained constant: to supply our products exclusively through a carefully selected and approved network of retail showrooms: each one knowledgeable of our product and able to offer you, the customer, a complete and professional service.

# GAS & ELECTRIC FIRES

## ENIGMA

- Deep fuel bed for an ultra-realistic effect
- Built-in flue restrictor to maximise heat output
- Heat output of up to 4.0 kW at 57% efficiency
- Coal fuel bed
- Suitable for class 1 and 5" lined flues
- Rear venting to reduce flue debris entering the fire
- Choice of manual or battery operated slide control
- Four trim options: black, brass, brushed stainless steel and polished stainless steel
- Compatible with a variety of decorative fire frets

## ENIGMA HE

- Heat output of up to 4.9 kW at 89% efficiency
- Excellent radiant heat output
- Ceramic glass front technology
- Suitable for class 1 and 5" lined flues
- Choice of manual, battery operated slide control and remote control

## ENIGMA SLIMLINE

- A superb flame picture with a glowing fire bed
- At only 120 mm deep will fit almost any flue
- Heat output of up to 4.1 kW at 58% efficiency
- Coal fuel bed
- Suitable for class 1, class 2 and precast flues
- Choice of manual or battery operated slide control
- Four trim options: black, brass, brushed stainless steel and polished stainless steel
- Compatible with a variety of decorative fire frets

## GAS FIRE EFFICIENCIES

	Setting	Input	Net Efficiency	Output
Enigma (N.G. only)	High	7 kW	57%	4 kW
	Low	4.8 kW	50%	2.4 kW
Enigma HE (N.G. only)	High	5.5 kW	89%	4.9 kW
	Low	2.4 kW	70%	1.9 kW
Enigma Slimline (N.G. only)	High	7 kW	58%	4.1 kW
	Low	2.4 kW	50%	1.2 kW

All featured gas fires are manufactured under a BS EN ISO 9001 quality system (registration number 5195), which covers all areas of product design, development, manufacture and service.

# GAS & ELECTRIC FIRES

## BROOKLYN

- Ecoflame™ 3D flame effect technology
- Choice of coal, glass, pebble or log fuel beds
- Choice of four flame effects
- Two heat settings, 750W & 1500W
- Suitable for a flat wall installation using a 3" rebate fireplace or surround
- Multifunctional remote control
- Manual over ride buttons
- Thermostat and timer as standard

## STATEN

- Constructed from heavy gauge mild steel with a cast iron door
- Large picture window
- Ecoflame™ 3D flame effect technology
- Realistic log fuel bed
- Choice of four flame effects
- Two heat settings, 1000W & 2000W
- Multifunctional remote control
- Manual over ride buttons
- Thermostat and timer as standard

## COLUMBIA

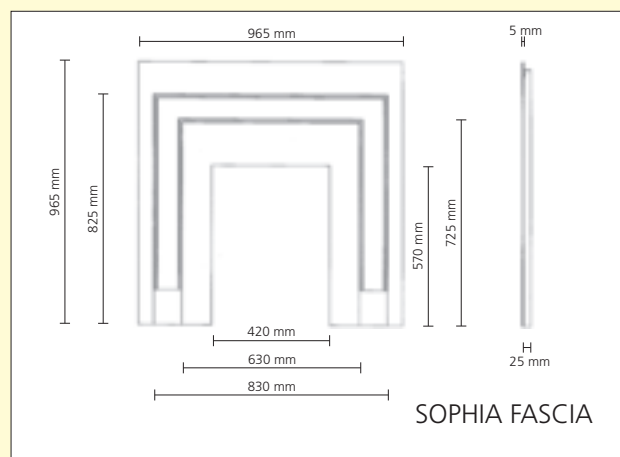

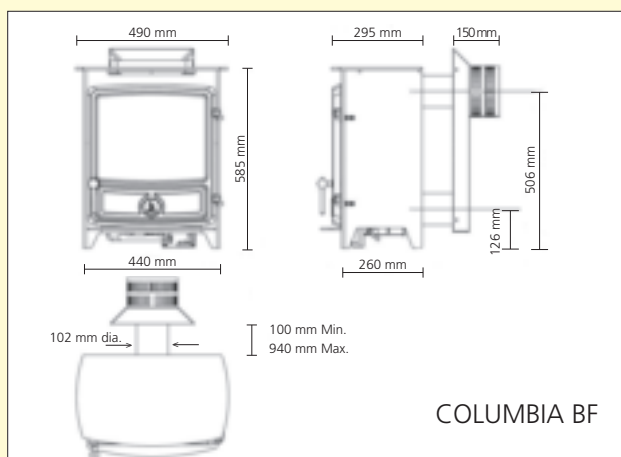

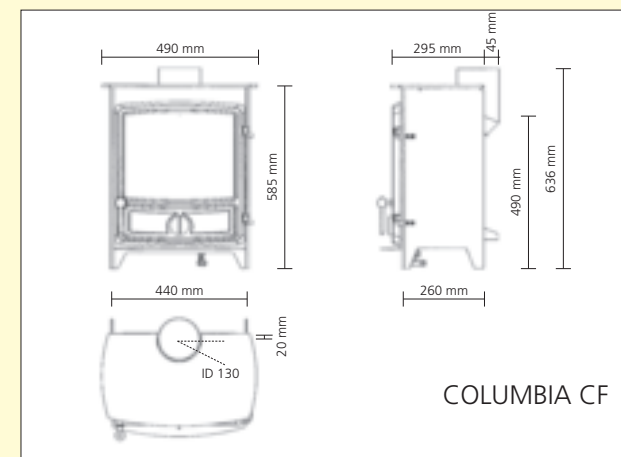

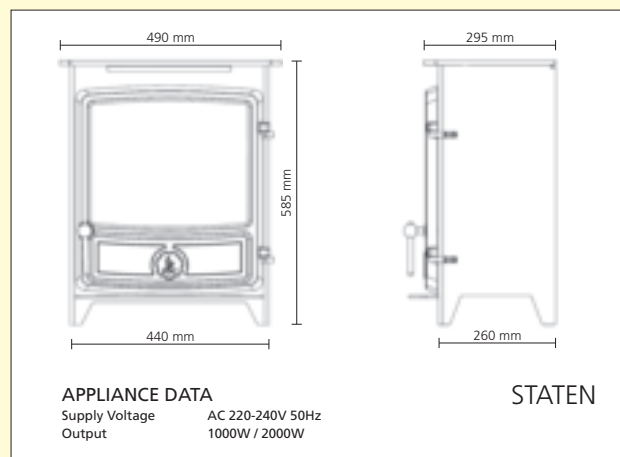

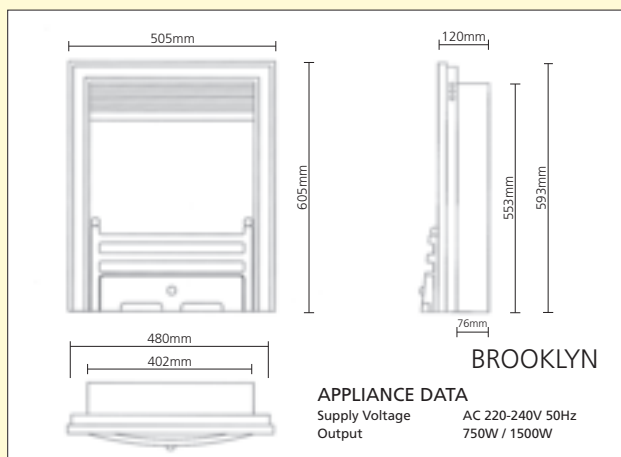

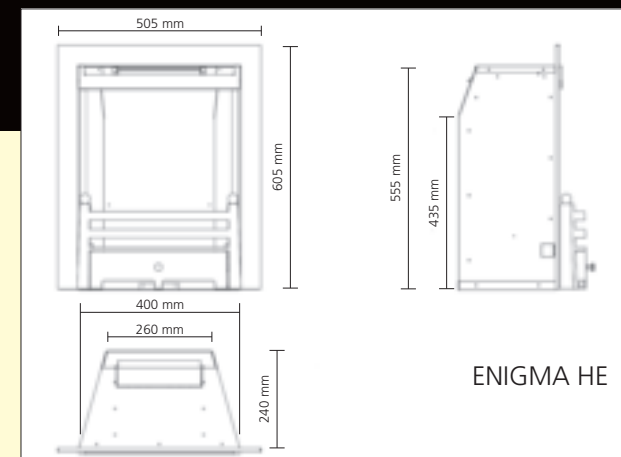

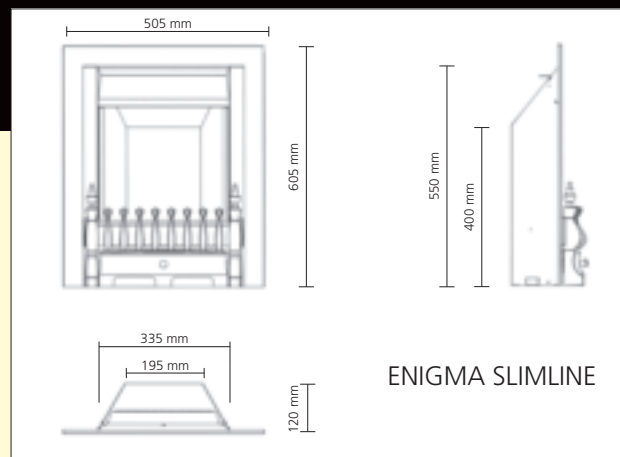

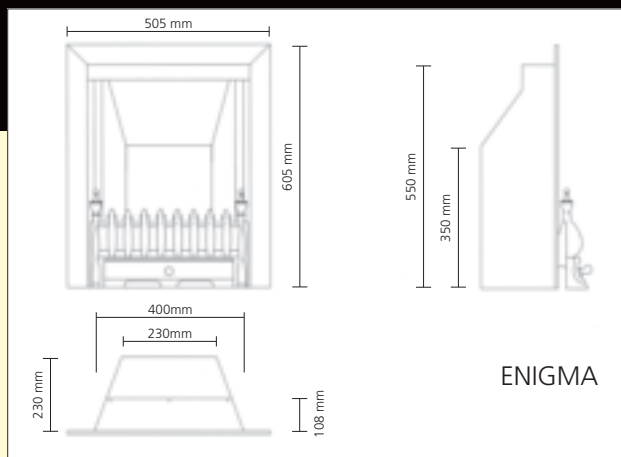

- Constructed from heavy gauge mild steel with a cast iron door
- Large ceramic glass window
- Ceramic log fuel bed
- Heat output of up to 3.6 kW at 78% efficiency
- Available for use with natural gas or LPG
- Top or rear flue option (rear closure plate supplied)
- Suitable for class 1, class 2 and precast flues
- Manual control

## COLUMBIA BF

- Constructed from heavy gauge mild steel with a cast iron door
- Large ceramic glass window
- Ceramic log fuel bed
- Heat output of up to 4.3 kW at 88% efficiency
- Available for use with natural gas or LPG
- No chimney required
- Balanced flue
- Remote control

All featured gas fires carry a 12 month warranty from the date of installation. Please ensure you complete and return the warranty registration page in the back of the instruction manual. Failure to register your fire will invalidate the warranty. Please note that the ceramic fuel bed, firebox liners and glass are not covered by the warranty however spares are available from your retailer.

## FEATURED MATERIALS

### MICRO-GRAIN MARBLE:

All the marble fireplaces and surrounds in this brochure are hand finished and, as such, all measurements are approximate and may vary slightly. Micro-grain marble is a man-made material comprising of up to 95% natural marble, the other ingredients are pigment colouring and resin. These are scientifically mixed, poured into a mould and allowed to cure. The blocks are then sawn into different thicknesses of slab ready for face polishing and processing into the finished fireplaces seen in this brochure.

Although the above processes are highly controlled, please be aware that pattern and colouring variations can occur from photographs, printed material and any showroom displays that relate to these products. Micro-grain marble back panels and hearths are not suitable for solid fuel applications. We also strongly recommend that micromarble back panels are sectioned into three pieces when used in conjunction with high efficiency / high output gas fires.

Polished fireplaces can be susceptible to scratching. To retain the lustre of your fireplace we recommend using a proprietary marble polish on a regular basis.

## IMPORTANT INFORMATION

### INSTALLATION

Having a new fireplace installed is a major project and it is advisable to prepare yourself as well as possible. Please ensure your chosen fireplace will physically fit your chimney breast and that it is compatible with the intended heating appliance. The best way to confirm this will be to organise a home survey with the retailer or your installer prior to purchase.

All installations must be carried out in accordance with the requirements set out in the Building Regulation documents, paying particular attention to Approved Document J. There are independent bodies which have been approved to carry out installations in accordance with these regulations. For gas installations, the most recognised independent body is GAS SAFE REGISTER and for solid fuel installations it is HETAS. It is essential to confirm with your retailer that your new fireplace will be installed appropriately. If you have your new fireplace installed by a GAS SAFE REGISTER (gas) or HETAS (solid fuel) registered fitter you will be given a certificate stating that your installation has been carried out in accordance with Building Regulations. If you do not have one of these certificates you will have to arrange for your local Building Control Officer to inspect and approve your installation.

### PRODUCT SPECIFICATION

FDC (UK) Ltd has a continuous research and development programme which may necessitate changes to sizes and specifications without prior notification. If any size is critical this should be made clear to your retailer at point of order. Likewise we may discontinue featured models or materials at our discretion and will not be held liable for any consequential losses. Please visit [www.fdcuk.co.uk](http://www.fdcuk.co.uk) for the most up to date information on our product ranges and, if still in doubt, telephone.

### THE FDC PLEDGE

You can purchase any of the products shown in this brochure with total confidence. In the unlikely event that there is a defect discovered on unpacking, a replacement part will be supplied without hesitation. Of course, this requires the products to be fully inspected prior to installation as no responsibility for refitting or redecoration can be accepted if defective products have been installed or products have been damaged during installation. In these cases and in the case of accidental damage after installation, in-situ repairs might be possible. Please refer to your retailer for further information.
